

The ultimate in fusion technology

xrWeigh: the instrument for the accurate and fast weighing of a broad range of fluxes

Super-fast! Can weigh out to mg accuracy in under a minute

Dose into **platinum crucibles** or **vials** using **ratio methods** or **catch-weights**

Suitable for **plain fluxes** or those with **additions such as sodium nitrate**

Easy clean feature to change out between flux types or for shift-end

Available in a single position format or with **carousel loading option**

Connectivity with your **LIMS**

Perth: 08 6240 3000
Melbourne: 03 9720 6339
