

# **Established Technology**

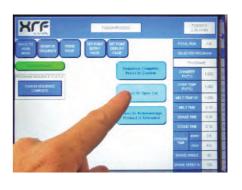

The xrFuse range of electric fusion machines has been developed based on more than 25 years of experience of fusion technology and applications. Now available in both a 6 place high volume solution and a 2 place compact model to cater for the needs of a broad range of customers. The xrFuse range represents the best elements of XRFS established electrical fusion range with significant advances in safety and design. Designed with the latest thermal imaging technology, consumer tested in the biggest XRF laboratories in the world, xrFuse is designed with the customer in mind.

## **Key Features**

### **Zero Contamination**

The ceramic cradle and holders ensure that the environment for creating beads has zero contamination in comparison with that typically found with Inconel based solutions.

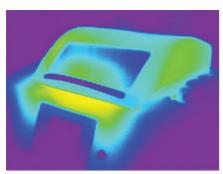

### **Process Flexibility/ICP**

The machine is designed to allow for both preheating and ICP processes. Simple to access, control and monitor, at the touch of a button.

### Simple User Interface

Simple touch screen interface. The User Interface is simple to use and provides the flexibility to cope with the simplest operation on a repeatable basis or the most complex one off experiments.

## **Safe Operation**

The external surfaces of the instrument have been modelled and developed with the latest IR technology to ensure all contact surfaces are safe to touch. CE Certified and independently tested.

### **Built to last**

The xrFuse range has evolved from robust and reliable technology developed for high volume, high up time applications in the Iron Ore industry in Australia. This tough environment has driven the development of machines with component lifetimes of up to 3 times of that of our major competitors. When you buy an xrFuse, it's built to last!

# **Ongoing Support**

The purchase of an xrFuse is the beginning of an ongoing relationship where we provide a range of services to our customers. Whether you are new to fusion or a seasoned professional, we have a range of services to increase the accuracy and throughput of your application.

- \* Advice on appropriate selection of flux and standards
- \* Organization of Platinum remake processes
- \* Technical advice on difficult fusion issues
- \* On-site support and preventative maintenance programs

Please see our website for more details of our representatives in your area

## **The Complete Solution**

#### Flux

We are the world's preeminent manufacturer of flux. We can provide standard Borate fluxes or custom solutions to meet your specific needs.

#### Labware

We manufacture Labware for all our fusion instruments in house. We can also provide a remake service for the transfer from other Labware designs.

#### Accessories

From polishing lathes through to release agent, we provide a complete range of fusion products and accessories.

| Technical Specification          | 2 place   | 6 place                 |
|----------------------------------|---|-------------------------|
| Maximum Temperature (Continuous) | 1250°C  |                         |
| Cradle/holders                   | High purity ceramic   |                         |
| Programmable Recipes             | 24  |                         |
| Insulation                       | Ceramic fibre board   |                         |
| Elements                         | Silicon carbide   |                         |
| Thermocouples                    | Type R  |                         |
| Construction                     | Single external aluminium case                                  |                         |
| Crucible                         | 30g   |                         |
| Mould                            | 32/40mm   |                         |
|                                  | 60-100g   |                         |
| Lid                              | Cool touch glass  |                         |
| Safety                           | CE certified  |                         |
|                                  | Independently tested by Pilz<br>Cat 4 rated dual safety circuit |                         |
|                                  | ·   |                         |
| Noise                            | <70db   |                         |
| Over temperature protection      | 2 <sup>nd</sup> thermocouple and insulation case thermostat     |                         |
| Throughput                       | Up to 10 beads per hour   | Up to 30 beads per hour |
| Size                             | 580*780*580mm   | 580*1110*800mm          |
| Power requirement                | 50/60Hz, 1/3-phase  | 50/60Hz, 3-phase        |
|                                  | 208-220v  | 380-415v or208-220v     |
| Power consumption                | 4kw   | 6kw                     |
| Weight                           | 90kg  | 100kg                   |
